CTKN tokens are not and will not be intended to constitute securities, digital currency, commodity, or any other kind of financial instrument. You don't have the right to buy CTKN tokens if you are a citizen or a resident (tax or otherwise) of the United States of America, or any other possessions of the United States of America, People's Republic of China, or South Korea, or a citizen or resident (tax or otherwise) of any country or territory where transactions with digital tokens and/or digital currencies are prohibited or in any other manner restricted by applicable laws. Please read carefully, section "Disclaimer of Liability" in Curaizon White Paper located at http://curatoken.curaizon.com/White_paper.pdf.

Problem

Medicines are our most cost-effective health intervention and represent the first line of defense against chronic and long-term conditions. Unfortunately, far too many people fail to take their medications properly and the resulting personal and financial costs are staggering. Despite a worldwide recognition of the seriousness of the issue (also called drug non-adherence), there has been no significant change for the last 30 years.

- Worldwide drug non-adherence results in approximately \$700 billion in additional healthcare costs.
- Pharmaceutical companies lose more than \$630 billion in revenue annually to patient non-adherence and the amount lost is increasing by 13% per year.

Solution

CuraServe™ is a complete healthcare ecosystem that improves drug adherence and brings game-changing benefits to patients and healthcare providers. We use a series of outreach tools and messages, supported by predictive modeling and behavioral analytics, to increase the rate of drug adherence. As our CuraServe™ solution helps patients, it's also generating a vast amount of patient data. That data is then anonymized and made available through CuraData™. The only way that pharmaceutical companies, academics and researchers can access this data is by purchasing CuraTokens™.

Our data is the first-of-its-kind insight into real-time patient behavior and adherence. CuraData™ will finally give the health and pharmaceutical industries the tools they have been looking for to bring about the change patients need. Our value-based approach to a simple, accessible, yet valuable exchange of data and analysis will revolutionize healthcare.

Healthcare is changing forever and CuraServe™ stands at the cutting edge of this transformation. Curaizon™ is the UK-based company that has developed CuraServe™.

Market

The total number of potential users of our platform include all of the patients covered by national health services across the world. This is a total of 1.4 Billion patients and growing.

Societal Benefits

- Better Lives
- Better Research
- Better Healthcare
- Money Saved

Token Overview

CuraToken™ (CTKN) is an EIP-20 Ethereum-based utility token which can be used to access medical adherence data via Curaizon's™ CuraData™ platform.
